

REMARKS

Claims 12 and 13 - dependent on claims 1 and 4, respectively -, should have been directed to a "polyamide body", rather than to a method.

Furthermore, claim 13 - covering the preferred range of 1 - 10 wt% of claim 4 should define the concentration of the modifier solution to be in the range of 1 - 10 wt% - not 1 - 70 wt%.

In claim 5, the second formula should correctly read

See description page 9, line 8.

Please introduce the above corrections in the present application.

Respectfully submitted,

Klaus J. Bach
